

# DANGER

The European Commission and the Council want to destroy the internet, as we know it, and make it possible for big corporations to govern and see everything that we do online.

## What is it about?

There will be widespread censorship of the content that you share online, should Article 13 of the reform be passed into law

## When?

On the 20th of June the European Parliament will decide on the new copyright proposal.

The deputies are the only ones who can prevent this proposal from becoming the new law.

## Become active!

Mail, twitter or call your deputy before the 20th of June and tell them to vote against the Articles.
